DATE:

June 2023

In June 2023, we completed over 7,000m² of resurfacing at Burntwood Way, Burntwood on behalf of Amey LG Ltd for Staffordshire County Council.

The roundabout is the link between the A5195 and the T6 exit/entrance of the M6 Toll. It sees a significant volume of traffic so the work could only be done during the night. We participated in several meetings to agree on a phasing

programme which caused the least disruption to the M6 Toll.

Over 6 nights we planed and relayed the surface course on the roundabout and on sections on the A5195. Around 80% of the area was replaced with HRA 35/14 F Surf Des & 14/20 PCC's to ensure better durability.

We made use of the KS12-16 Extendachip which allowed us to lay all 3 rings of the roundabout, dog legs and varying patches with one chipping machine.

The works were completed on time and to a high standard, with the ride quality of a busy junction being significantly improved.
